About Final Assignment

Your task is to create a **business proposal based on the given data**. From data and market analysis, you need to **identify the client's business problem and present a solution**.

You will need to do market analysis, exploratory data analysis, building machine learning models, and business proposal.

How to Get Started

© MATSUO-IWASAWA LAB, THE UNIVERSITY OF TOKYO

1. Download the materials

Download the “Final Assignment” folder from the class materials

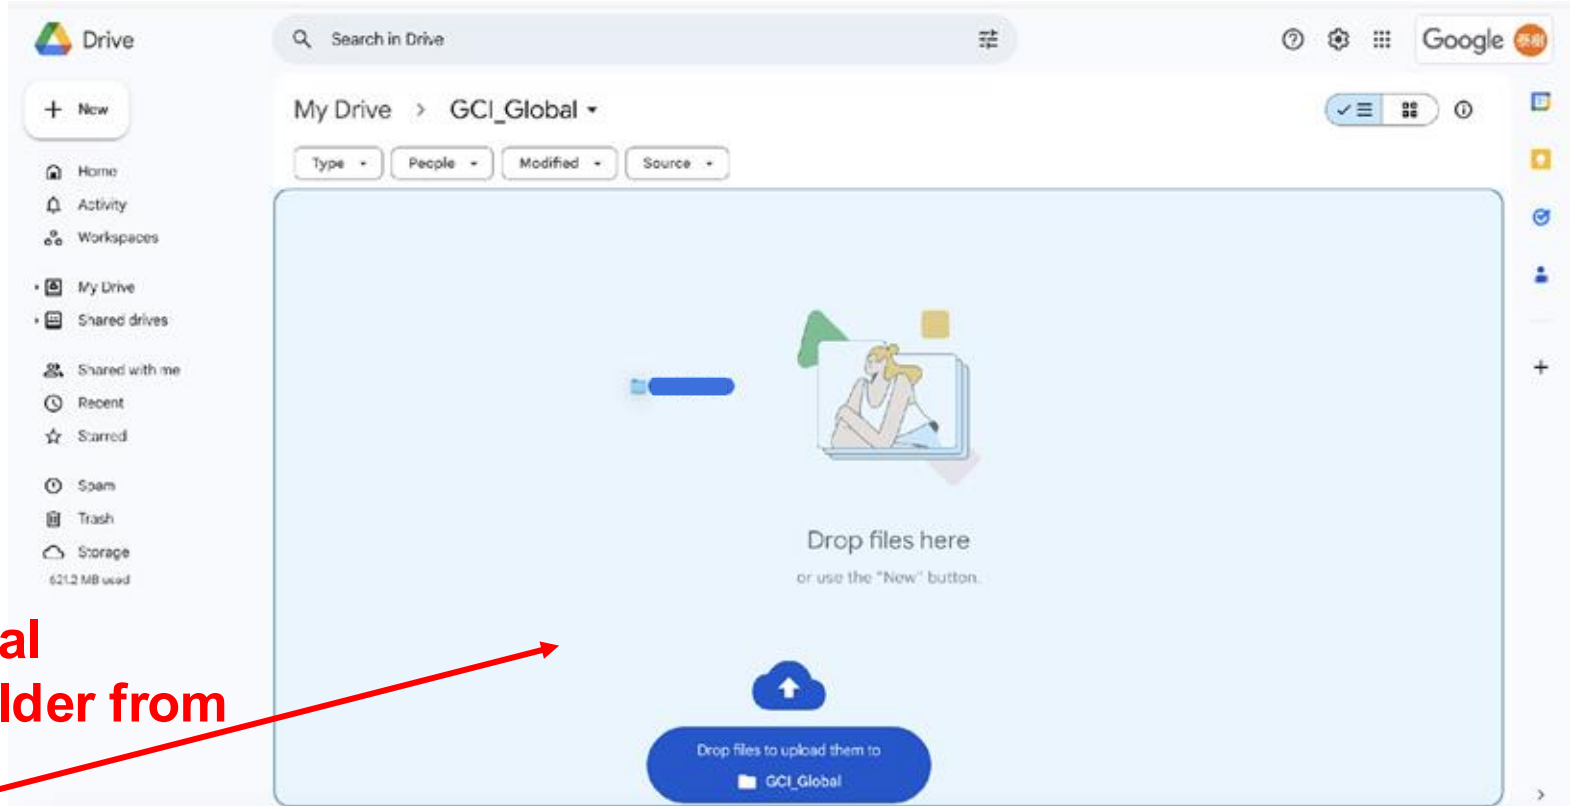

© MATSUO-IWASAWA LAB, THE UNIVERSITY OF TOKYO

2. Upload the dataset to your Google Drive

Unzip the downloaded ZIP file.

Then, upload the “Final Assignment” folder to your MyDrive.

(It can be anywhere in your MyDrive, but you will need to adjust the PATH accordingly later)

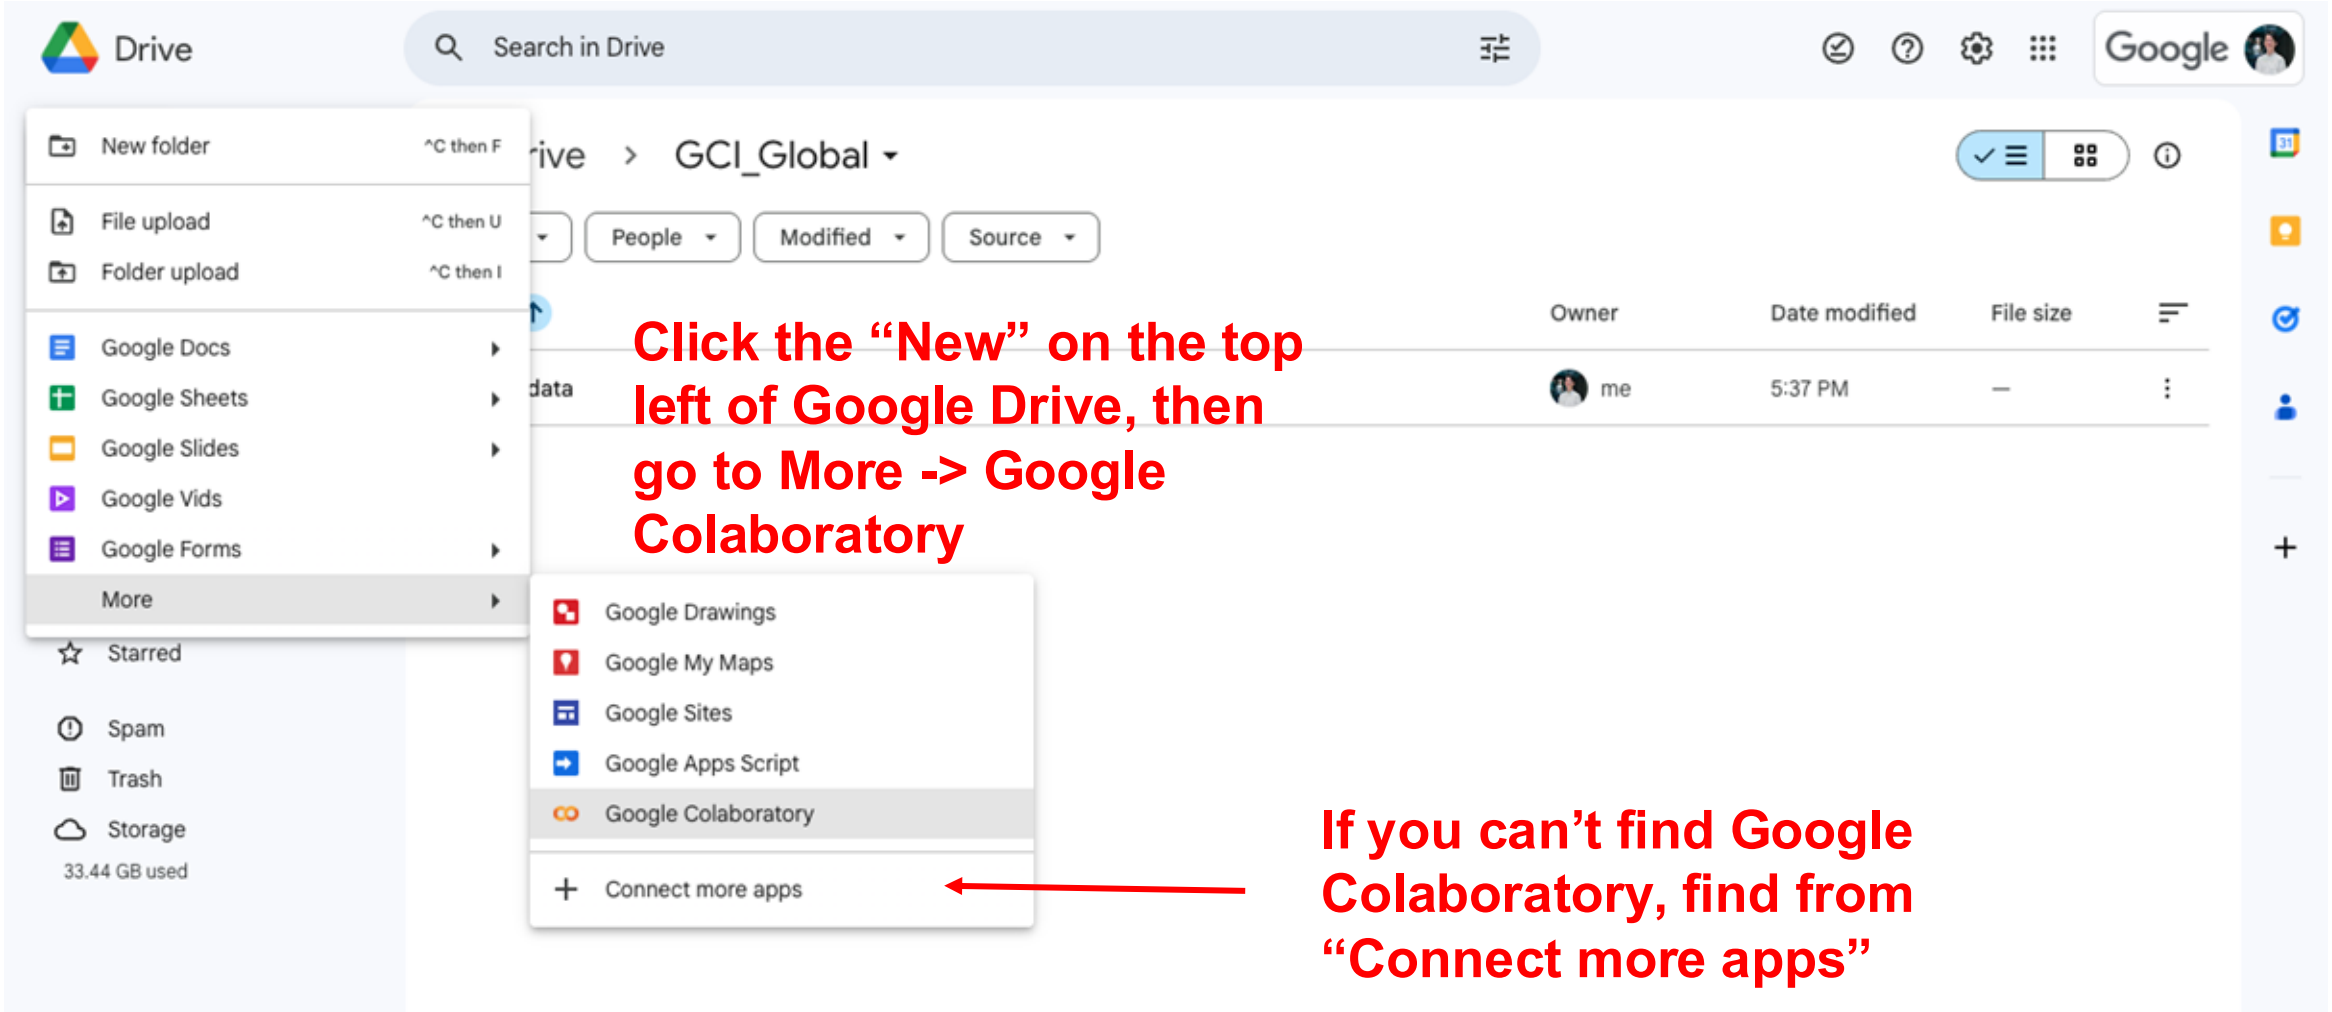

Upload the “Final Assignment” folder from your local PC

3. Create a Colab notebook

Inside the folder where the data you uploaded is, create a new Colab notebook

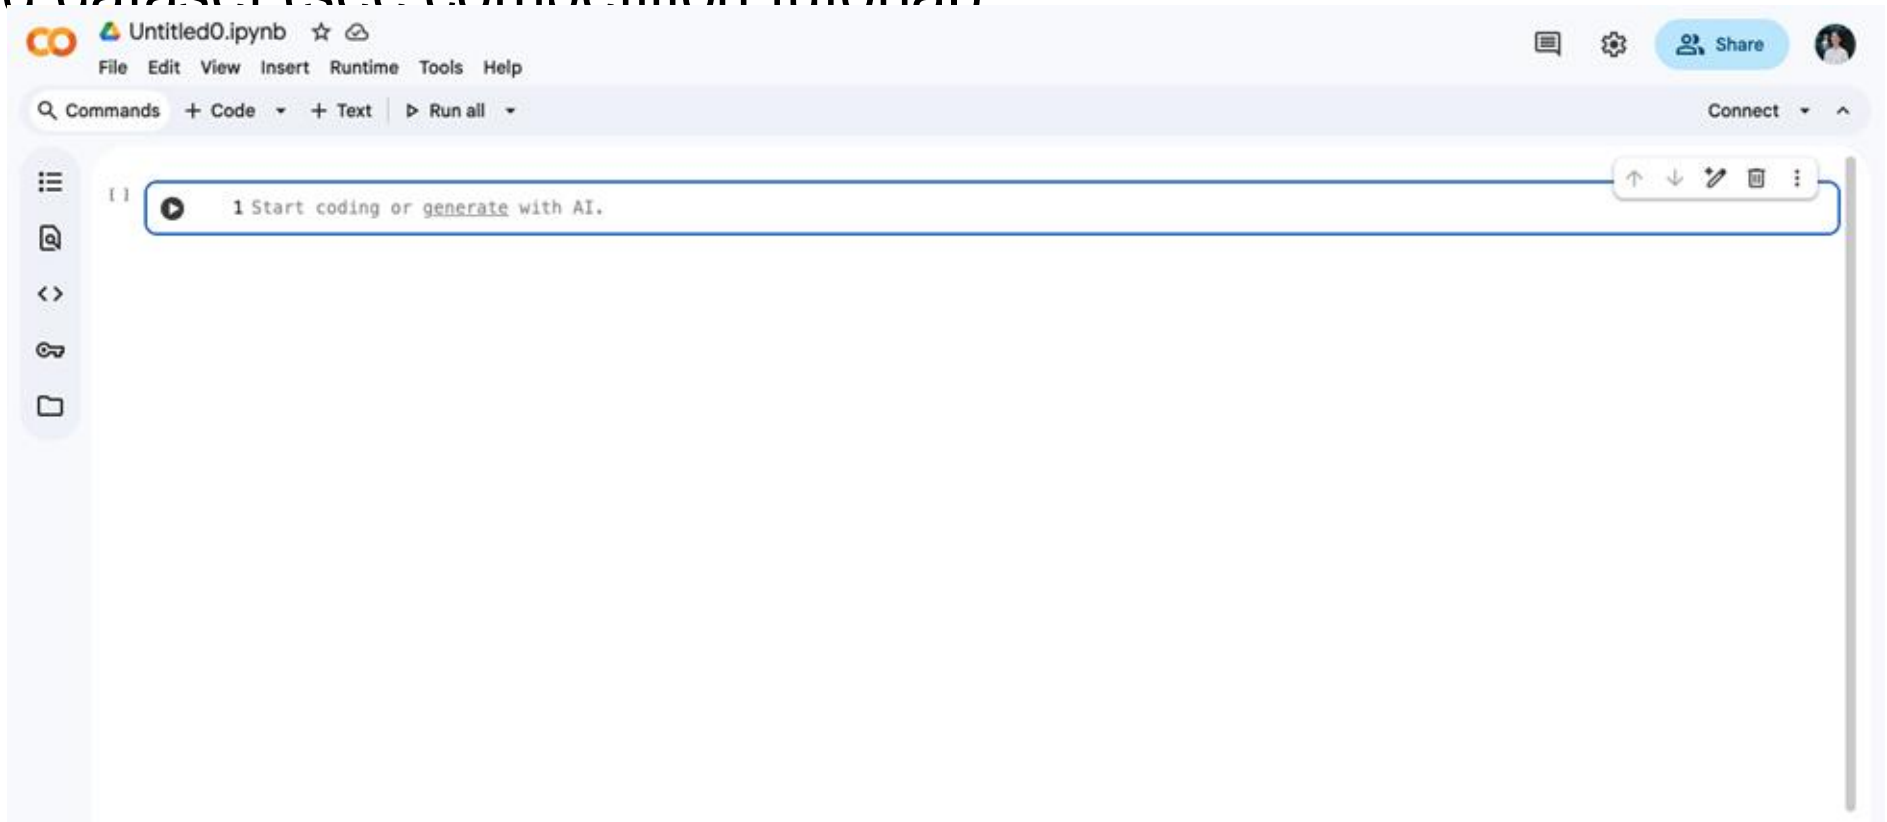

© MATSUO-IWASAWA LAB, THE UNIVERSITY OF TOKYO

4. Happy Coding!

Start writing codes!

Some hints:

- Import libraries
- Mount Google Drive (see competition tutorial)
- Load dataset (see competition tutorial)

Frequently Asked Questions

Q. Can I resubmit my work?

A. Yes, you can submit as many times as you want if it is before the deadline.

Q. Can I use any generative AI?
A. You may, but be sure to include the chat history URL in the list of references.

Q. What do I need to submit?
A. Slides (up to 15 pages, PDF format), Jupyter notebook (or python code), and list of references.

Q. Are late submissions accepted?
A. No.

Final Assignment Workflow

Repeat the process

	Understand the background	Create a hypothesis	Deepen your hypothesis	Create your proposal	Verify your proposal
Data Engineering Approach	**EDA** **Data Preparation** ・Understand the meaning of each feature ・Identify the target variable	**Create Your Hypothesis** ・Identify the problem from EDA and survey results	**EDA** ・Focus on your hypothesis and conduct further data analysis ・Create new features if needed	**Create your proposal** ・List possible proposals based on your findings ・Set metric(s) to evaluate the proposals	**Verification** ・Evaluate your proposal's effectiveness from results of your predictive model or data analysis ・Identify what elements would be affected to evaluate your proposal ・Pick the proposal that is most effective
Business mindset	**Understand the background of the market** ・What kind of business does the client do? ・What do they focus on? ・What are the trends? What are some common problems?		**Identify the bottleneck** ・Identify the workflow and stakeholders related to your hypothesis to find a solution to the problem you identified ・Survey existing solutions
